Scenario:
You leave your house fast since you are late for work, and you accidentally leave the door of your apartment open. Unfortunately, your dog decided to escape and your wallet is lost, which means probably someone stole it. Luckily, you have a mini tracker on both things.

Task 1: Track your dog., Rooster, on the map, and see where he's at.
Task 2: Once located, register your dog as lost on the Lost Page
Task 3: Track the wallet and see where it is at

Notes:
What changes should you make to your application:
- Add a voice message option for when chatting with customers
- Add a video chat option once someone finds your pet
- Add a profile to your belongings that have the tracking device

What you need to keep the same for your application:
- Easy accessibility to the GPS map
- Live feed of where objects are at
- Registered devices on the front screen
